

Holden Psychological Screening Inventory (HPSI™)

Author: Ronald R. Holden, Ph.D.

PURPOSE	To screen for underlying dimensions of psychopathology
ADMINISTER TO	Individuals 14 years and older
ADMINISTRATION TIME	5 – 7 minutes (36 items)
SCORING OPTIONS	Hand-scored/Online
TRAINING	None
LANGUAGES	English

The HPSI was developed to screen for the three major dimensions of psychopathology, namely Psychiatric Symptomatology, Social Symptomatology and Depression.

ASSESSMENT SCALES

The HPSI has the following scales:

PSYCHIATRIC SYMPTOMATOLOGY: Hypochondriasis, Anxiety and Thinking Disorder

SOCIAL SYMPTOMATOLOGY: Interpersonal Problems, Alienation, Impulse Expression

DEPRESSION: Depression, Social Introversion, Self-depreciation

Additional sub-dimensions: Persecuting ideas, deviation

AREAS OF APPLICATION

The HPSI identifies general areas of potential psychopathology that warrant further examination

REPORT OPTION

The HPSI Profile Report summarises the results of an individual administration, providing scores for all scales.

SOUTH AFRICAN RESEARCH

Although South African research is not currently available for the HPSI, JVR Psychometrics welcomes the opportunity to partner with clients in conducting research studies in their practices.
